

Recognizing the unique challenges that Alzheimer's and Dementia pose, Summit by Morrison's Memory Care Community is specifically designed for residents who require this specialized care. Our highly-skilled and compassionate staff tailors each resident's care plan to his or her specific needs. All staff members are trained with the use of "Habilitation Therapy", which is the gold standard for Dementia education and sponsored by the Alzheimer's Association.

Building on our experience in caring for people who have memory challenges, we have taken great care to include elements such as increased natural lighting, providing a true home-like atmosphere, a thoughtful layout that promotes a sense of independence and meal choices in our Memory Care Community.

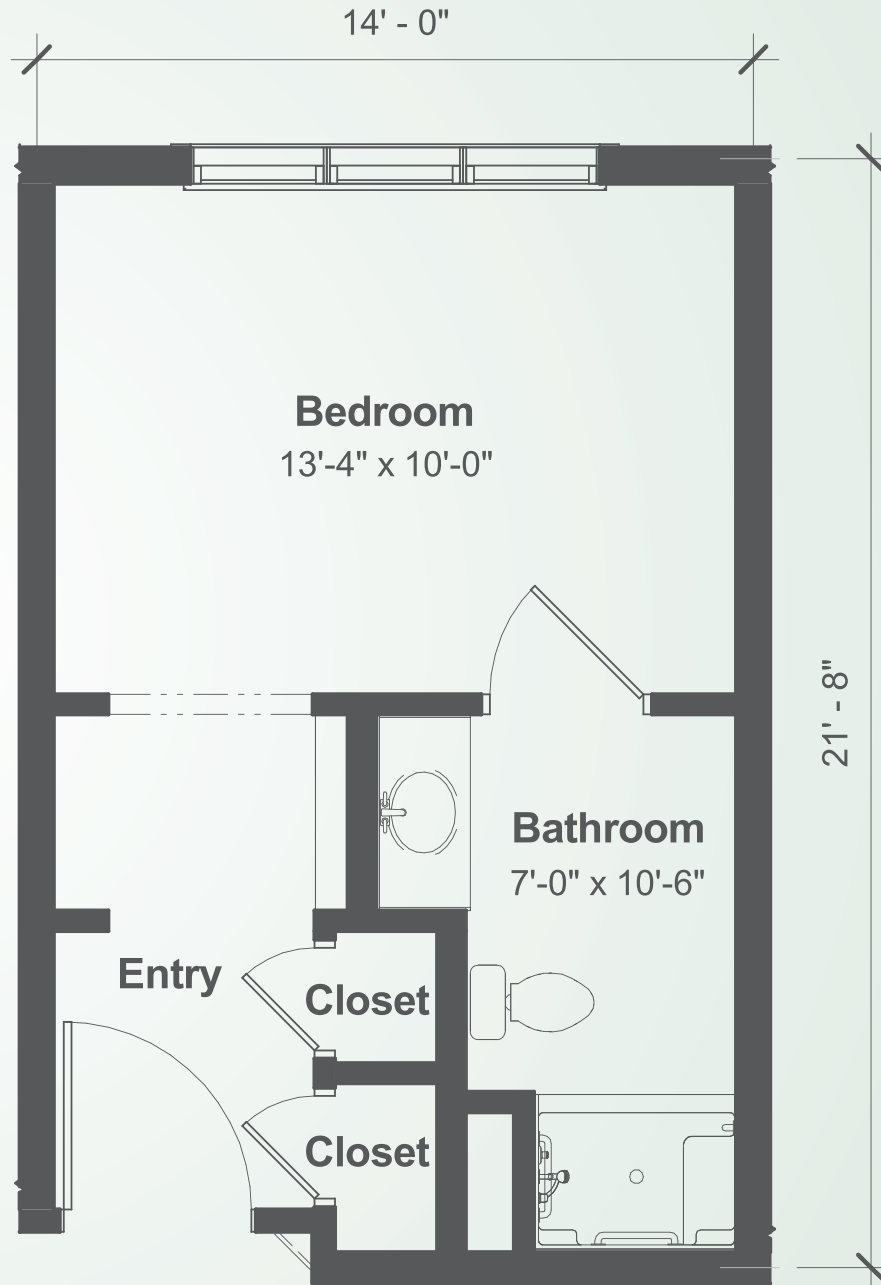

Residents can enjoy gathering spaces, including a cozy den, living room, library and activity rooms, and explore the outdoors in the memory garden, an enclosed and secure private garden. We also offer innovative programs to help residents of the Memory Care Community remain active and engaged. Physical therapy, occupational therapy and speech therapy services are also available.

We understand the importance of providing a safe and secure environment for residents by using secured doors that are monitored with a non-intrusive system. With a dedicated, compassionate staff that specializes in providing individualized care, residents of Summit by Morrison Memory Care Community enjoy:

- Clinical assessment and individualized care planning
- Supervision and safety checks
- Three meals per day, including:
 - Made-to-order breakfast
 - Lunch and dinner prepared in the community kitchen
- Mid-morning and afternoon snacks and beverages
